

## Common Core Approved Pornography

*The Bluest Eye* is on the Common Core's list of exemplar texts for **11<sup>th</sup> graders** and is highly recommended reading.

This book is just one of many books of concern on the reading list for the anti-Christian and anti-American values.

This one contains **extremely explicit sex scenes describing incest, rape, and pedophilia.**

The defenders of this book say "... the actual demographic of students reading this book, right around age 16 and 17, are no strangers to the public world of sex. In reality, many of them are beginning to have their own **sexual experience right around ages 16-18.** To deny them intellectual and challenging literature **because the traditional community** is too uncomfortable with taboo subjects like **pedophilia and incest** only deprives that student of understanding the deeper emotional and psychological complexities behind the taboo."

Parents may be surprised to learn that public education does not promote abstinence until marriage but rather how to have safe sex at any age.

Toni Morrison

The  
Bluest Eye

## What are they planning in D.C.?

The Federal Reauthorization of the  
Elementary and Secondary  
Education Act of 1965

*S. 1094: Strengthening America's  
Schools Act of 2013*

**An amendment in this bill by  
Senator Al Franken is sneaking  
homosexual education into public  
schools, forcing mandatory pro-gay  
lectures upon all public school  
children, even kindergarteners.**

Al Franken claims the intent is "to  
stop bullying of LGBT students."

A better title for this amendment  
would be "**No Child Left Unmolested**"  
because it mandates a pro-homosexual  
federal curricula for all public schools,  
and defunds any school that resists.

This deceptive campaign will **force  
Christian educators to teach that there  
is "no right or wrong"** and **removes  
power from parents** as it bullies children  
to reject their parent's religious beliefs.

Threatening the loss of funding to  
school districts that **refuse to teach  
young children about sexual lifestyles**  
breaks the local control over curriculum  
that is granted by the constitution.

The mission of Operation Jericho Project  
is to encourage pastors and leaders to raise  
awareness with parents in their congregations  
or communities about what their children are  
exposed to every day due to the indoctrination  
of the federal government educational system.

## Obamacare Funnels \$75 Million to Planned Parenthood to Push Sex on Kids

by Paul Rondeau | LifeNews.com | 3/27/13 11:37 AM

While the White House says sequestration has eliminated funds for children touring the White House, President Obama has no problem spending \$350 million federal tax dollars for sexual indoctrination programs starting in kindergarten for those same children.

This is not your grandmother's sex education about how things work and what can go "wrong." In fact, the exact opposite is the essence of the Personal Responsibility Education Program (PREP): Obamacare funnels \$75 million annually into PREP, which must be used exclusively for Planned Parenthood-style "comprehensive" sex ed programs where no type of sex is wrong and the only sexual behavior PP considers "unsafe" is becoming pregnant.

More than one-fourth of the funds - \$20 million - has been awarded to a coalition of six Planned Parenthood affiliates, operating under the name Northwest Coalition for Adolescent Health, to implement HHS's TOP program across Montana, Oregon, Idaho, Washington, and Alaska at over 50 sites. In Oregon schools, Planned Parenthood is paying children cash incentives to participate.

PP is funded with our tax dollars to market sex to our children in our schools under the

Our government has determined THEY know best about what our children should learn about sex and when they should learn it.

## It's Perfectly Normal? Far from it!

### 16 Perfectly Normal Masturbation

During puberty, when the sex hormones cause boys' and girls' sex organs to become more active, many kids begin to have even more pleasurable and excited feelings about their own bodies—and they may also be more attracted to and interested in other people's bodies.

These feelings are often called sexual feelings or "feeling sexy." Even though they are hard to describe, they are normal feelings. They happen at different times and in different ways for different kids. Boys and girls, teenagers, and grown-ups too, experience sexy feelings when they masturbate. Masturbation is touching or rubbing any of your body's sex organs for pleasure—because it feels good. One everyday term for masturbating is "playing with yourself."

Max: "I've heard that I've heard about that."

Just another kid's word. That's all it is.

Some people think that masturbation is wrong or harmful. And some religions call masturbation a sin. But masturbating cannot hurt you. And it does not result in pregnancy or in getting or passing on infections that are spread by sexual contact. Many people masturbate. Many don't.

Whether you masturbate or not is your choice. Masturbating is perfectly normal. When people masturbate, they usually rub their sex organs with their hands or with something soft, like a pillow. A girl often rubs her clitoris; a boy often rubs his penis. Both the clitoris and the penis are sensitive to touch.

have a close, loving, and sexy relationship with another person.

Sometimes, when people choose to have vaginal intercourse, they have planned to have a baby. But other people may want to wait to have a baby or may not want to have a baby at all. That's why knowing how to prevent pregnancy is important.

Both control and contraception are the two names given to the many ways of preventing a pregnancy.

Contra is the Latin word for against. Conception is part of the word conception, which means beginning. Contraception means against beginning a pregnancy.

There are many kinds of birth control, and some work better than others. A person must learn how to use them correctly and every time he or she has sexual intercourse in order for them to work. However, no method of birth control can be guaranteed to work 100 percent of the time. Condoms, spermicide, and sponges are types of birth control that can be bought at a drugstore, a convenience store, or even a supermarket. They are usually displayed in a special section or on the counter next to the cash

this cover that fits over an erect penis. When a male ejaculates, semen is kept inside the condom and sperm are not able to unite with an egg. But sometimes semen can leak out. A condom pre-lubricated with silicone or a condom used with a water-based lubricant can prevent the start of a pregnancy. The lubrication can also keep a condom from breaking or slipping.

Putting on a male condom  
Condoms are called "rubbers" because they are usually made out of a rubbery material called latex. There is another type of male condom, made out of a strong, fairly thin, rubbery

and hepatitis B and A can pass through tiny pores in the latex and cause a person to become infected.

Do condoms are rubbers?  
Not like the ones you wear on the road!

A condom designed to fit inside the vagina, called the female condom, is also made out of polyurethane. This soft pouch-like condom is inserted into the vagina before sexual intercourse. Using a new condom during sexual intercourse, correctly and every time, can also help prevent the spread of infections—mild infections as well as life-threatening infections such as HIV and hepatitis B and A. This is a way of practicing safer sex. It's important for people to understand that any type of birth control method, when used by itself—without a condom—cannot prevent a person from getting an infection from or passing on an infection to another person.

ing not to do any sexual activity that carries risk for

Sexual intercourse usually begins with two people touching, caressing, kissing, and hugging each other.

After a bit, the female's vagina becomes moist and slippery, her clitoris becomes hard, and the male's penis becomes erect, stiff, and larger. Sometimes a bit of clear fluid that may contain a few sperm comes out of the tip of the penis and makes it wet. The female and male begin to feel excited about each other.

It is now possible for the male's erect penis to go inside the female's vagina, which stretches in a way that fits around the penis. The moisture from the vagina makes it easier for the penis to go in.

This kind of sexual intercourse is called "vaginal intercourse." It is also called "vaginal sex."

As the male and female move back and forth in rhythm, the movement of the penis inside the vagina soon feels very good. The

Every time a couple has vaginal intercourse it can result in a baby—unless the female is already pregnant.

"It's Perfectly Normal" is a textbook that is currently being used in our public schools for 10-year olds.

Promoted and administered by Planned Parenthood, this is the mandated Sex Ed curriculum aligned to the Common Core state standards.

Sex Ed courses which also include teaching of alternate sexual lifestyles are already **MANDATED** in some states and **parents are NOT ALLOWED** to opt out.
